Office Action Summary

Art Unit: 1752

DETAILED ACTION

Upon reviewing the potential interference, it was noted that certain claims may not be allowable. Accordingly the current office action rejects and addresses those issues.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20, 22, 23, 25 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mertens et al.

The claimed invention is drawn an article of manufacture having coated thereon a photoresist composition comprising a resin binder, a photoactive component and a polymeric dye that contains one or more polycyclic chromophores, said dye compound being a polymer wherein the polymer has a weight average molecular weight of at least about 5,000.

Mertens et al discloses a photosensitive composition comprising a binder resin (col. 26, lines 46-56), a photoactive compound (col. 16, lines 46-58) and sensitizers which have poly cyclic chromophores (col. 22)

Art Unit: 1752

Mertens et al lacks the use of a polycyclic chromophore used in an example.

It would have been *prima facie* obvious to one of ordinary skill in the art of photochromic articles to use an addition sensitizer as disclosed in column 16, line 67 - column 26, line 39 and reasonably expect same or similar results as disclosed in the examples.

Motivation is based on the desire to have additional sensitizers to increase the spectral range of the composition.

2. Claims 24 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Claims 1, 4-15, 18 and 19 remain allowable over the prior art of record.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Laridon et al '752 and '245 disclose photochromic compositions having polymeric photochromic dyes.
